

ARTS AND CRAFTS

LEARN TO KNIT

Learn the art of knitting from clueless to capable. Learn to cast on, do basic stitches, cast off and finish, make a small dish cloth or scarf. Please bring a pair of size 8 knitting needles and an 8-oz skein of worsted yarn in a light to medium color (harder to see mistakes in dark colors and you want to learn properly.) You will practice, select a project and make it. Some homework may be required.

CABINET MAKING

This is an awesome opportunity that we are pleased to bring to any serious woodcraft student! Scott has a beautiful, fully-equipped workshop where this class will take place. He has been designing and making quality custom wood furniture for over 25years and has several years of experience teaching students like you who may come in with a keen interest but no skill or experience. This is a REAL craft project - NOT a kit. A wide range of skills are taught beginning with safe tool and equipment use and progressing through the use of tools including scrapers, planes, chisels and saws. Learn proper use of power tools such as table saws, routers, planers & jointers. Every student will construct a cabinet from solid stock lumber including the carcass, face frame, frame and panel door, dovetail drawers and router-made moldings. (See sample in the Adult Education office) All supplies are included in the registration fee. You will take your completed (un-stained) cabinet home with you on the last night. A limited number of students are accepted for each class so that personal attention can be given to each.
